Re: Ford Motor Company Strike

Ford Motor Company has been in negotiations with UAW since July 2023.

Effective 9/29/23 the UAW strike has impacted Ford Chicago assembly plant. As a result, DTS line U625 was impacted.

U625 afternoons are scheduled to work a four-hour shift on 9/29/23.

All DTS hourly employees assigned to U625 would be on temporary layoff effective 10/2/2023.

You'll be required to file for unemployment with the UIA- Michigan Unemployment Insurance Agency. Contact UIA (Marvin) at 1-866-500-0017 or visit their website www.michigan.gov/uiia to access or create an account.

DTS will ensure to notify the UIA of temporary layoff for U625 and request a work waiver as well. UIA will determine eligibility for approval of unemployment.

However, if you have vacation time available, you can submit your request for vacation time.

A text message will be sent to communicate updates on the strike, layoffs and when you'll be able to return to work. You'll be required to visit the DTS website detroitthermalsystems.com click on news for an update.

WFQ and Resource MFG staffing agencies will communicate with the temporary employees regarding layoffs and return to work status as well.

Please ensure your contact information is updated in ADP. If you're unable to update your contact information in ADP. Please complete personal data status change form and return it to HR.

Thank you,

Sherry Manuel
HR Manager
